COMPENSATION:	\$90,000 - \$110
LOCATION:	510 Area Code
TYPE:	
CLIENT NAME:	Confidential

Recruiter:

Matthew Allen

matthew@verticalmove.com

CLIENT INTRO

Verticalmove is partnering with the leading provider of online customer community solutions. Their solutions let companies create vibrant, popular communities that increase sales and customer loyalty while decreasing customer care costs. Companies such as Dell, Cingular, Palm and Nokia are using their solutions to increase the efficiency of their customer support teams as well as reduce costs. In addition to hosting support communities, they get close to 1.5Billion hits on their other online communities, forums & blogs. They have been in business since 2001 and have been profitable the whole time. They have a small development team that is implementing Scrum as the development process. They have recently landed 9M in funding from two VC's that specialize in Software as a Service (SaaS). Some of their other customers include Zone Labs, Real Networks, Salesforce.com, Intuit, Paypal, Linksys and Univision to name a few. They foster a very friendly atmosphere with open communications among team members with very little "office politics" and they promote from within

JOB SUMMARY

We are looking for a candidate to lead the design of software that millions of people use every day. You should be interested in social software and believe in user-centered design.

We work in an agile environment, and you will collaborate daily with product managers, developers, writers, and testers to develop workflows and designs that are beautiful and functional.

RESPONSIBILITIES

The ideal candidate likes owning and taking responsibility for a great Web UI that will stop others in their tracks! If you are looking to explore your creative side, this is a perfect role for you. In this role you will take on a highly visible position where your work will be seen by millions.

EXPERIENCE REQUIRED

- Experience with user-centered design of complex Web applications.
- Major bonus points for leadership work on high volume consumer sites.
- Double bonus points for social networking and online community sites.
- Expertise with tools such as Photoshop and Illustrator.
- Usability testing and feedback management, and a willingness to iterate on designs until we get it right.
- An understanding of information architecture and how to manage large volumes of dynamic content.
- Bonus points for HTML/CSS abilities and an ability to write clean, elegant markup.

EXPERIENCE DESIRED

If you have a portfolio or links to your work, please send with your resume.
